

Supplement of

Simulating glacial dust changes in the Southern Hemisphere using ECHAM6.3-HAM2.3

Stephan Krätschmer et al.

Supplement Material

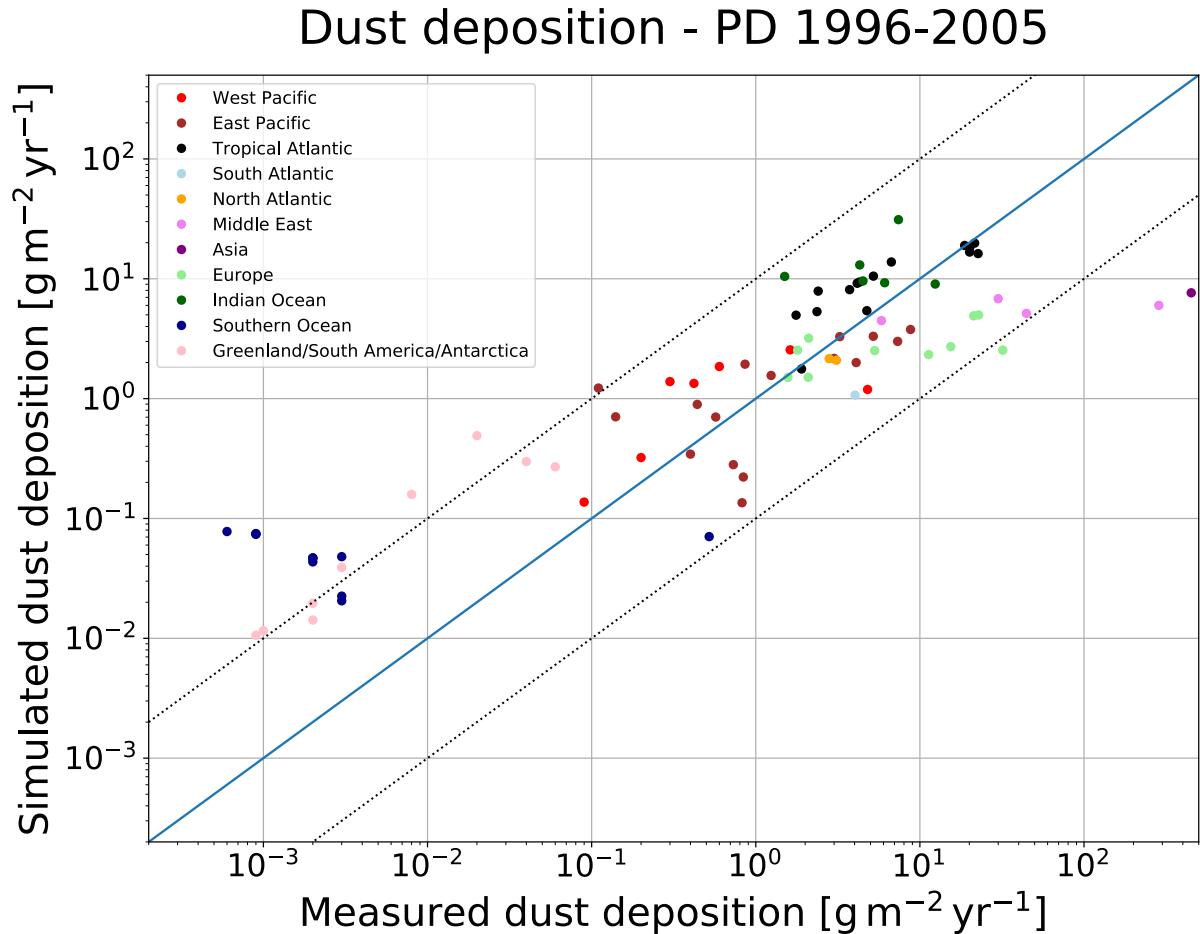

Figure S1. Scatterplot showing the comparison of the total dust deposition simulated by our model to observational data from 84 sites (Huneeus et al., 2011) for present-day climate conditions. The plot suggests in particular in the West Pacific an improvement of the model used in our study compared to the older version used by (Stanelle et al., 2014).

Total dust deposition - PD 1996-2005

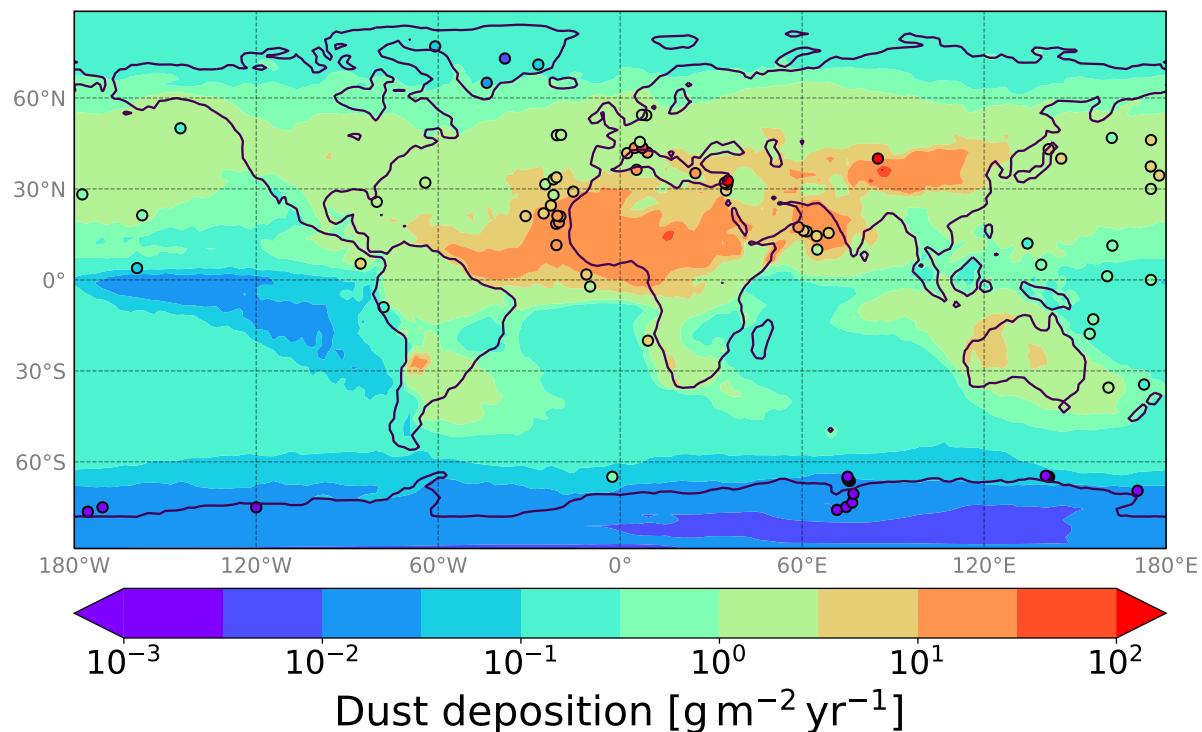

Figure S2. The map shows dust deposition data from 84 sites (points, Huneeus et al. (2011)) compared to the dust deposition simulated by our model for present-day climate conditions.
