### Erratum to: Polar Biol DOI 10.1007/s00300-016-2029-4

In the original version of the article, Tables 2 and 3 contained various errors. Please find the corrected tables printed here (Tables [2](#), [3](#)).

---

The online version of the original article can be found under doi:[10.1007/s00300-016-2029-4](https://doi.org/10.1007/s00300-016-2029-4).

**Table 2** Coefficients and significance of crabeater linear models on log density (Norwegian and South African surveys), and the three negative binomial models for the German data

Factor	Norway	South Africa	Germany ( <i>all seals</i> )		
			<i>High ice</i>	<i>Medium ice</i>	<i>Low ice</i>
OnShelf	−1.72***	−0.85*			1.5319***
DEdge			−1.30**	−0.38**	
$\sqrt{\text{DEdge}}$			0.85*		
IceExtent	−0.43***	−0.86**	0.40***	0.104	
dIceExtent	0.30***		−0.21**		
Ice			0.50		
$\sqrt{\text{Ice}}$			−0.25	0.585***	
DEdge:IceExtent			1.17***	**	
dIceExtent:Ice			0.95**		
dIceExtent: $\sqrt{\text{Ice}}$			−1.22***	0.40**	
OnShelf:IceExtent	−1.36**	0.78			
OnShelf:dIceExtent	−1.99***				
$R^2$	0.317	0.17			
$\hat{\theta}$			0.78 (0.07)	0.53 (0.15)	0.055 ( $5e-3$ )
$\Delta\text{BIC}$	36.2	6	38.3	9.06	1.6

All parameter estimates are given for standardized covariates (except the binomial OnShelf variable)

The significances are coded according to  $p$ -value: \*\*\* <0.001 ≤ \*\* <0.01 ≤ \* <0.05 ≤ − <0.10

**Table 3** Coefficients and significance of binomial glm's for the two Weddell seal and leopard seal models

Factor	Weddell seals		Leopard seals	
	Norway	South Africa	Norway	South Africa
OnShelf		1.09***	−6.95 <sup>−</sup>	0.88***
DEdge	2.19	3.25***		
$\sqrt{\text{DEdge}}$	0.20***	−2.77***		
IceExtent	−11.7***	−0.15*		−0.62**
Ice			−0.88 <sup>−</sup>	
DEdge:IceExtent	−26.8***	−1.14***		
$\sqrt{\text{DEdge}}:\text{IceExtent}$	16.0*			
OnShelf:Ice			−5.01*	

All parameter estimates are given for standardized values of the covariates

The significance is coded as in Table 2
